Journal of Wind Engineering and Industrial Aerodynamics, 48 (1993) 417–418
Elsevier

Contents Volume 48 (1993)

Vol. 48 No. 1

The effect of transition to turbulent flow in tubing networks for fluctuating pressure measurement
J.H. Kaspersen and P.-A. Krogstad (Trondheim, Norway) 1
Numerical solution of turbulent Taylor-vortex flow
J.F. Hasiuk (Chicago, IL, USA), J.D. Iversen, R.H. Pletcher and R.G. Hindman (Ames, IA, USA) 13
Comparison of aerodynamic roughness measured in a field experiment and in a wind tunnel simulation
R. Sullivan and R. Greeley (Tempe, AZ, USA) 25
Influence of non-Gaussian local pressures on cladding glass
D.A. Reed (Seattle, WA, USA) 51
An object-oriented approach to wind-related structural safety analysis
F. Naeher, D.A. Reed (Seattle, WA, USA) and S.J. Fenves (Pittsburgh, PA, USA) 63
Letter to the Editor: Evaluation of loads from pressure measurements
T.V. Lawson (Bristol, UK) 79
The behaviour of glass under wind loading
I. Calderone and W.H. Melbourne (Clayton, Vinc, Australia) 81
Procedure de dimensionnement au vent des bardages et ventures: approches experimentale et numerique
C. Solliec, G. Barnaud et A. Chaibi (Nantes Cedex, France) 95
The application of the Quasi-steady Theory to full scale measurements on the Texas Tech Building
C.W. Letchford (Queensland, USA), R.E. Iverson and J.R. McDonald (Lubbock, USA) 111

First announcement and call for papers 133

Vol. 48 Nos. 2–3

Preface v
Some comments to wind induced vibrations of slender structures
O. Fischer (Prague, Czech Republic) 135
The boundary layer wind tunnel: an experimental tool in building aerodynamics and environmental engineering
H.-J. Niemann (Bochum, Germany) 145
Multimodal galloping of dense spectra structures
A. Luongo and F. Di Fabio (Monteluco di Roio, Italy) 163
The stochastic differential calculus for the determination of structural response under wind
G. Bartoli and P. Spinelli (Florence, Italy) 175
Nonlinear model of wind-induced vibrations of slender structures with circular cross-sections
P. d'Asdia (Rome, Italy), A.L. Materazzi (Perugia, Italy) and E.F. Radogna (Rome, Italy) 189

Elsevier Science Publishers B.V.

Structural monitoring and numerical analysis of the wind response of old cooling towers
C. Borri, L. Galano, V. Gusella (Florence, Italy) and F. Bettinali (Milan, Italy) 205
Forecast models for damping and vibration periods of building
S. Lagomarsino (Genoa, Italy) 221
A methodology for the study of coupled aeroelastic phenomena
G. Piccardo (Genoa, Italy) 241
Wind design of the Great Belt East Bridge: A historic retrospect
N.J. Gimsing (Lyngby, Denmark) 253
Aerodynamic aspects of the final design of the 1624 m suspension bridge across the great belt
A. Larsen (Lyngby, Denmark) 261
Aerodynamics of wind effects on the Akashi Kaikyo Bridge
T. Miyata (Yokohama, Japan) and K. Yamaguchi (Tokyo, Japan) 287
The aerodynamic advantages of a double-effect large span suspension bridge under wind loading
C. Borri (Florence, Italy), M. Majowiecki (Bologna, Italy) and P. Spinelli (Florence, Italy) 317
Turbulence effects on flutter velocity of long span suspended bridges
G. Diana, S. Bruni, A. Cigada and A. Collina (Milan, Italy) 329
Aeroelastic behaviour of long span bridges with "multibox" type deck sections
M. Pecora, L. Lecce, F. Marulo and D.P. Coiro (Naples, Italy) 343
Statistical analysis of extreme wind speeds in the Straits of Messina
M. Bocciolone, M. Gasparetto (Milan, Italy), S. Lagomarsino, G. Picardo, C. Ratto and G. Solari (Genoa, Italy) 359
Wind tunnel investigations of the tower for the Stretto di Messina bridge
G.L. Larose, A. Damsgaard (Copenhagen, Denmark), G. Diana and M. Falco (Milan, Italy) 379
The aerodynamic design of the Messina Straits Bridge
F. Brancaleoni (Pescara, Italy) and G. Diana (Milan, Italy) 395
